MICR V Series Encoder

Batch / C.S.S. / P.O.D. MICR Encoder

Made in the USA

A fast, accurate & reliable check encoder is a must for any financial or retail location. The MICR V series encodes, lists, updates totals, and optionally endorses all types of financial documents in a single pass. Streamline your daily operations even further when you select one of Maverick's industry standard Exception, Batch, P.O.D., or Cash Settlement applications.

Our Exception Item application provides single or full-field encoding for all types of exception items. It is a valuable tool behind the teller row for lobby deposits, counter checks, and starter kits. Encoding at point-of-entry allows proof and item processing departments to operate more efficiently by decreasing the time it takes to handle exceptions in these production oriented environments.

Batch, P.O.D., and Cash Settlement applications allow retail customers to pre-encode the amount field as part of their daily deposit processing. Tendered media (Cash, Checks, Debit Cards, Credit Cards, Gift Certificates, Coupons, etc.) is processed in one simple and cost efficient procedure that does not increase your end of the day processing time or cost.

The MICR V is a modular system that allows you to increase efficiency by adding a high capacity endorser, an autofeeder or sort pocket capabilities.

Combine the MICR V with an Autofeed module to increase throughput and expand the processing window for deposit preparation and reconciliation. When ready, upgrade to high capacity endorser, and if you need to route checks to different departments or several financial institutions, add on Sort Pockets to eliminate hand sorting. This allows you to grow your system changes.

ADDITIONAL FEATURES

- Financial Batch Processing
- Proof of Deposit (P.O.D.)
- Cash Settlement System (C.S.S.)
- Multiple Exception Item Fields
- Batch Recall
- Clean Batch Listings
- Register/Teller Totals
- Repeat Encode
- Acct. # CDV/CDG
- Calculator Mode
- Full Field Encode

MICR V Series Encoder

With minimal space requirements, the MICR V encoder provides the optimal solution for Exception, Batch, P.O.D., or Cash Settlement encoding.

With performance in mind, the MICR V can encode at a rate of 3,400 documents per hour. The unit is parameter driven and all attributes can be selected through the keyboard by simply turning them on and off.

Maintenance has been reduced to simply replacing the MICR V Ribbon Cartridge, which is simple and fast. Our unique "maintenance-free" metal hammer eliminates the need to replace the print hammer with every ribbon change, with an average life of 65 million print characters (approximately 650 or more MICR ribbons).

Nationwide Sales and Customer Support

The full line of Maverick Products are sold and serviced nationwide by a highly trained and professional network of Maverick Distributors. For more information about the MICR V and other products please contact your local authorized Maverick Distributor or the Maverick corporate office.

SPECIFICATIONS

Encoder Dimensions:	Length:	18.0 inches	Height:	6.0 inches
	Width:	12.0 inches		
Detached Encoder Dimensions:	Length:	13.0 inches	Height:	6.0 inches
	Width:	12.0 inches		
Detached Keyboard Dimensions:	Length:	6.0 inches	Height:	1.5 inches
	Width:	8.5 inches		
Autofeeder Module Dimensions:	Length:	11.5 inches	Height:	5.0 inches
	Width:	14.0 inches		
Sorter Module Dimensions:	Length:	16.5 inches	Height:	6.2 inches
	Width:	16.0 inches		

Keyboard:	39 keys with up to 45 programmable function keys
Transport Speed:	20"/sec, 3400 DPH
Display:	Cool Blue 20 character, 2 line, alphanumeric, dot matrix, back lit LCD
Printer:	24 column, dot matrix
Endorser:	Optional InkJet Programmable Endorser available on M570x, M580x & M5000x series encoders
Standard Interface Port:	RS232
Interface Port Options:	RS232, RS422, RS485, TTL, 20ma Current Loop, External 10BASE-T Ethernet TCP/IP
Ribbon:	Average yield of 100,000 characters (P/N#: 039-49015-1, 6 ribbons)
Print Hammer:	Average yield of 65 million impressions
Font:	E13B (optional: CMC7 and OCR A/B)
Power:	120/240 VAC (auto-switchable) 50/60 Hz
